

Proposed Agenda Item: Area 21 Website Change

It is recommended that Area 21 create a section of their website that is password protected for use by members of the Area only. This part of the website could be used for information such as the GSC materials (PAI's and background material, list of Advisory Actions and Considerations, copy of the FCR, etc), materials from the Area Assemblies (Officer Reports, Area budget information, Assembly minutes, Area Committee Meeting minutes, Assembly Agendas, Proposed voting items, etc), links to recordings of Delegate Roundtable sessions and other Area meeting recordings, contact emails for Area Officers and Committee Chairs and any other materials specific to the Area members and not the general public.

The password would be distributed to Area members through the Registrar, as all information is distributed now.

The public section of the website would not be changed from its current format or information available. This section would only increase the information on the website available to Area members. This would help distribute information from the Assemblies and generate interest in attendance.

Within the ECR (as an example), there are 10 of 14 websites which have this type of section for member-only materials.
